## OVERVIEW

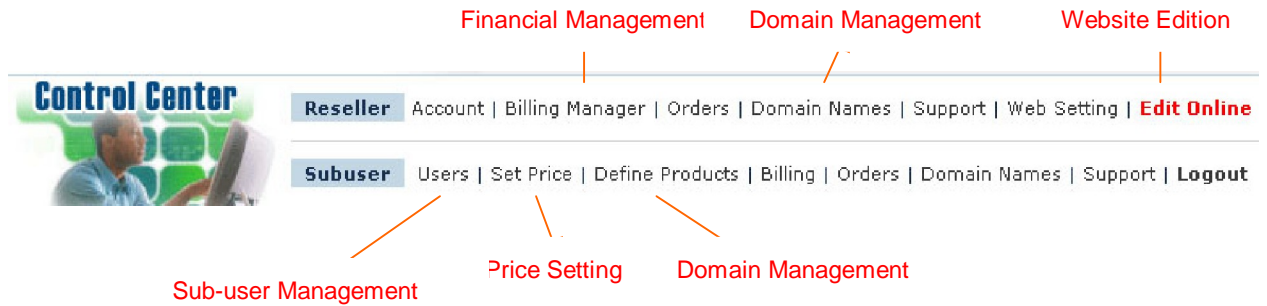

The Turn-key system is Internet-based and implemented by the partners. With turn-key website, partners can provide their customers with automatic real-time services and the concerned management tools.

- Ø Turn-key gets rid of the limitation that Channel partners have to process all the operation on behalf of their customers.
- Ø With turn-key, channel partners can instantly create their own website online with their own names.
- Ø Customers can apply for their account, purchase and manage products by directly logging-in the partners' website.

## MANAGEMENT

In Tury-key Control Center, customers can utilize several functionality including Financial Management, Domain Names management, website Edition, sub-user management, price setting and other functionalities.

### 1. Management For Resellers

The reseller can log in his account to manage the finance with CNOBIN, Domain Names registered himself, website edition and other functionalities.
